Latinas a varias ſentencias de Philoſophos, oraciones Latinas diez y ſiete, prefaciones Latinas onze, declamaciones Latinas nueue, Eglogas militares en verſo Latino quinze. Dialogos muchos, y Epiſtolas muchas, y obras ſueltas muchas, y tres libros en verſo Latino de mortis cogitatione & effectu, y la Guzmaneida, que ſon grandezas del Duque de Medina Sidonia, cinco libros en verſo Latino, en Romance la vida de Alexandro Magno, ſacada del texto Griego de Arriano, que todo eſto junto viene a ſer mas de trecientas y ſeſenta manos de papel con letra muy menuda y apretada, como puedo moſtrarlo a todos luego. Y eſto no es mucho pues dize Iamblicho, que Mercurio Triſmegiſto eſcriuio ciento y diez mil pliegos de papel. Yañado, que tengo eſcritas tres Soterias, y vn Genethliacum al Pricipe de Eſpaña, y cinco Epithalamios, todo eſto en verſo Latino heryco, y los Apopthegmas de Arſenio, vertidos en Latin, y vna obra a quien llamo Grammatophengia en Latin, y la primera parte del Catalogo de Caſſaneo en Romance. La fabula de Phaethon en 4000. verſos, vn himno a San Iſidoro, otro a San Leon Papa, vna obra a quien llamo Æ lurotaphió tiene 500. verſos, vn libro de Furore Poetico, & in ſano Phæbi Afflatu, tiene mas de mil verſos. Pſychologion en alabanças del frio, tiene 1200. verſos, vna Paraphraſis en verſo Latino a todos los Euangelios de la Quareſma, tiene 9000. verſos. Alopecium donde ſe trata que todo es engaño y mentira, tiene mas de 1000. verſos. Melodimata Latina 200. diſtichos. Triũphus ignorantiæ tien 3000. verſos. El Quinto Calabro en verſo Latino, tiene caſi 20000. verſos, vna Paraphraſis Latina, al Paternoſter, y otra al Aue Maria, tiene 6000. verſos. La Paraphraſis que hizo Nonno Panopolitano al Euangelio de San Iuã en Griego, pueſta en 6000. verſos Latinos; vn libro de numero Quinario vn Poema Epico de los Reyes Catholicos, y otras muchas coſas que no me acuerdo, y otras que me han hurtado.

En la lengua Hebrea he hecho poco eſtudio, porque como es coſa corta, y ſolo neceſſaria para la Sagrada Eſcritura, ſolo tengo la Cognicion del Arte, pero eſtoy de modo en ella, que no me dà dificultad para poder proſeguir a qualquiera eſtudio mayor. Y porque es razon, que ava ſatisfacion de todo en tan grande multitud y copia de obras que tengo eſcritas, ſi alguno quiſiere examinarlas, y ſe obliga a emendar algunos errores, le prometo de dar vn doblon por cada vno que con razon de arte moſtrare que lo fuere; y ſi yo le conuenciere, que ſe obligue a darme otro: porque con el caſtigo, y con el premio, quede, o leuantada la honra al vencedor, o caſtigado el atreuimiento al vencido. Que ſi todas eſtas obras no han ſalido a luz, no es por culpa dellas, ſino porque haſta aora no han hallado algun Principe que lo ſea en imprimirlas como ellas lo merecen para eſtar impreſſas.

Pienſo que V. m. con dificultad dará credito, y Fè a tantas obras que digo que tengo eſcritas, aunque deſtas, ya V. m. ha viſto alguna parte. Solo puedo aſſegurar a V. m. que he dexado de poner algunas, solo porque pierda el cuydado de querer que las vea todas, para que todas las crea, y aun entonces le cauſará admiracion, que yo aya eſcrito tanto. Siete Ciudades, con interes de honra, ſe atribuyen a ſi a Homero, Stagira, queda glorioſa con Ariſtoteles, Arpinas con Ciceron, Cordoua cõ Seneca, y otras con otros: porq̃ vn hombre ſabio es honra de vn ſiglo, de vn Reyno de vna Patria. Y de eſto ſe halla pocos: y pienſo que es la cauſa el poco premio que ay: porque la ignorancia ſe lo lleua todo, ſiendo tan neceſſario el ſaber para el gouierno del mundo, como lo dixo Platon, que entonces florecerán las Republicas, quando los Reyes ſerán Philoſophos, y los Philoſophos Reyes. Yo veo que aora ſe vſa poco deſto, porque con quatro coplitas que eſcriuen algunos ſe leuantan con todo: quierra que puſieſſen los ojos en eſto, y en el gran teſoro que tiene el Eſcurial en Griego y en Arabigo, ſin auer quien ſepa, ni leello, porque ſin cognicion de lenguas, es impoſible que aya doctrina ſolida. El eſtimulo con que ſe leuanta vn ingenio, es la honra y el premio, eſte ſigue ſi no lo merece, pero otro le conſigue. Muchos eſcriuen, pero pocos ſaben eſcriuir. El eſcriuir bien, tiene atencion a vn grande ingenio, y a vn grande fundamento: eſte pende de las lenguas, y de las ciencias, que quando eſtas eſtán vnidas con vn entendimiento viuo, entonces hazen vno ſabio de veras, el qual raramente ſe halla: porque ſiempre es raro el merito, es raro el que le poſſee.

CLARISSIMO, ET AMPLISSIMO VIRO DOMINO WALTERO RALEGH, EQVITI aurato, rei metallicæ per Cornubiam & Deuoniam *Præfecto, Ducatus Cornubiæ & Exoniæ Seneschallo,* & Regij ſatellitij Capitaneo, Domino *ſuo plurimum obſeruando.*

CVm mę genius meus, & medicæ artis pars antiquiſſima (cui à teneris ſum initiatus) Chirurgia, in admirationem primum, mox in ſerium rei herbariæ ſtudium impuliſſent; ita me tum honeſta voluptas deliniuit, tum vtilitas immenſa detinuit, vt nec illius pœniteat, nec huic non plurimum debere me agnoſcam: quare conquiſiui vndique, quicquid Anglia noſtra ſuppeditat, alieno etiam orbe magnis ſumptibus accerſita, aſſiduitate infracta noſtrorum hortorum curam lubenter ſubire condocefeci. Hanc ego ſupellectilem longè antè mihi comparabam, fouebam, cum Botanologicum noſtrum nuper foras datum meditarer. Ex quo opere ad noſtrates non mediocre, vt exiſtimo, redijt commodum, adeoq; ex ijs multos, tanquam claſſico ſigno dato, incendi, meoq; exemplo ad præclarum hoc ſtudium inuitaui: ſic vt nec Honorem tuum, Mæcenas nobiliſſime, Napæas dedignari facilè colligam. Id quod mihi tanquam palmarium obtigiſſe duco. Quid enim gratius ampliuſq; potuiſſet vnquam mihi accidere, quàm in famulitium & clientelam tuam cooptari? Cuius tam domi moderatio animi, & in rebus gerendis dexteritas, quàm longinquis partum expeditionibus peregrinationibuſq; nomen, in magnam ſpem Angliam vniuerſam erexit, vt de tuo Honore, accreſcentibus annis, ſumma ſibi polliceatur. Quidni igitur, ego me omni obſequio, tali viro deuoueam & mancupio addicam? addico ſanè, ac lubens, & opellam noſtram quantulamcunque vbicunque humillimè ſubiectam profiteor. Atque adeo, quicquid ego à plurimis iam retrò annis ſtirpium ſiue exoticarum, ſiue indigenarum alo, (alo autem vtriuſque generis & plurimas & rariſſimas) ſiquidem præſentius mihi hoc tempore non occurrit ſtudij mei & deuotiſſimi obſequij teſtandi pignus, tui facio iuris, vt Honoris tui arbitrio dominum mutent: vel eo nomine gratæ, vt ſpero, futuræ, quòd cùm eas cominus in horto tuo quotidie contemplabere, Indicarum nauigationum tuarum, rerumq; orbe remotiſſimo geſtarum dulciſſimam memoriam refricabunt. Cæterùm vt Honori tuo rectiùs de munuſculo conſtet, Catalogum hunc, eccum! concinnaui, præambulonemq; offero, cuius indicio & quod voles petas, & quod petes habeas. Nec enim, ſcio, Patronum dedignabuntur Napææ eum, à quo harum dominus vnicè pendet.

T. H. omni obſequio deuinctiſs.
cliens & ſeruus,
